AI in Manufacturing

Addressing Integration and Infrastructure Readiness

The manufacturing sector is rapidly advancing its digital maturity, with 76% of firms ready to adopt new technologies and 34% already seeing returns from AI-driven initiatives, according to KPMG. This reflects a sector eager to leverage AI for smarter production, predictive maintenance, and streamlined operations. However, this optimism must be matched with practical solutions.

Event Spotlight

Vertiv Concludes Successful Participation at Supercomputing Asia 2025

Vertiv recently participated at **Supercomputing Asia 2025** in Singapore, an annual convention that gathers the brightest minds in high-performance computing including thought leaders, decision-makers, and industry professionals.

We closed the event with thought-provoking discussions led by our Vertiv experts—Tony Gaunt, Alvin Cheang, and Chin Tuck Chien—exploring the transformative impact of AI on critical infrastructure and how Vertiv is empowering customers on their HPC journey.

We thank everyone who visited the Vertiv booth and showed interest in our AI solutions, including the Vertiv™ CoolChip 100 coolant distribution unit (CDU), the Vertiv™ Liebert® XDU1350 CDU, and the Vertiv AI reference design.

Let us help you in your AI and HPC journey!
