Vertiv™ Liebert® SiteScan™ Web

Release Notes

VERSION 9.0, AUGUST 2024

Release Notes Section Outline

1. Release Overview
2. Features and Enhancements
3. Technical Support Information

1. Release Overview

Vertiv™ Liebert® SiteScan Web software version 9.0 provides new security and platform updates as well as several minor feature enhancements. Version 9.0 is available to existing customers of the Vertiv™ Liebert® SiteScan™ Web software who are currently running version 3.0 or later. Versions prior to 3.0 will require an intermediate upgrade before proceeding to the latest version.

Benefits of Upgrading your Vertiv™ Liebert® SiteScan™ Web System

- New Features: Enhance operator efficiency and increase satisfaction with new features.

- Security: Keep Vertiv™ Liebert® SiteScan™ Web up-to-date with software revisions to patch security vulnerabilities and protect your data and users.

- Performance: Improve performance and reduce costs, helping it run faster and more efficient.

- Compliance: Many organizations require keeping software up-to-date. By maintaining the latest revision level, you'll ensure you follow these regulations with this software as well.

Support Plans for Legacy Vertiv™ Liebert® SiteScan™ Web Software Versions

- Effective August 30, 2024, Vertiv will officially place Vertiv™ Liebert® SiteScan™ Web software versions 8.0 and below into end-of-support and end-of-service-life (EOSL) status.

- Versions 8.5 and 9.0 will remain fully supported.

- Customers with legacy versions will be able to upgrade to a supported version after the EOSL date.

2. Feature and Enhancements

This version of Vertiv™ Liebert® SiteScan™ Web includes the following new feature improvements and enhancements.

Version 9.0 Improvements and Enhancements

FEATURE	IMPROVEMENT
Alarms	• Added a new alarms summary to provide a visualization that enables users to easily pinpoint the alarm location • Improved alarm counts on the Alarms View page • Added new Restful API to read alarm data
User privileges and sign-on	• Implemented a single Sign-On add-on to enable enterprise authentication integration to OIDC and SAML 2.0 protocols • Improved granular control over the needs of multiple operators • Added new Licenses & Add-ons page that consolidates all licensing and add-on administration into one location
Setup functionality	• Improved the Set Up Tree functionality • Updated the right-click Configure menus to match the Set Up Tree menu
Downloads	• Implemented changes to the SiteBuilder, Set Up Tree, and drivers to support multiple downstream IP downloads
Additional features	• Added new Security Review report to show the contents of the sreview command • Added new Resource Management utility to easily facilitate the transfer and organization resource files on your server
