Vertiv Site Assessment Program

Ensure the integrity of your critical infrastructure with a site assessment from Vertiv. Receive a roadmap for improving the reliability of your business-critical spaces in a report you can use for future planning.

Site Assessment Includes:

- Meet with a local Vertiv representative to review options who will walk the data center and provide a free consultation.

- Survey of critical infrastructure through a thorough on site walkthrough of IT Environment, server rooms, IDF's, and MDF's including but not limited to:

  - UPS capacity, health and redundancy

  - Cooling capacity, health and redundancy

  - Power generation capacity, health and redundancy

  - Rack configuration and airflow

  - Room survey for energy efficiency

  - Monitoring Tools

  - Single Points of Failure Determining Risk

- Make recommendations on best practices for future reliability and risk mitigation taking into consideration:

  - Equipment Needs

    - Power

    - Cooling

    - Rack PDU

    - Monitoring

  - Expected Growth

  - UPS Age and Topology

  - Service Level Agreements

  - Budget Considerations
